Electromagnetic weapons can kill, torture, and enslave; but the public is largely unaware that they exist, because these weapons operate by stealth and leave no physical evidence. The first reports of electromagnetic weapons tested on human beings began in 1976, but dates further than that. By widely dispersing the involuntary human test-subjects, and vehemently attacking their credibility, it has been possible for the United States to proceed with these human experiments unhindered by discussions or criticisms, let alone opposition.

This ultimate weapon system is currently being deployed in Iraq. The US Air Force and the Marine Corps refer to it as "active denial technology", as if it were used purely for defense, but it is not..

A weapon system that operates at the speed of light, that can kill, torture, enslave and escape detection. **Harlan Girard**

Active denial technology is the cornerstone of the system employed to torture 2,000 persons in the privacy of their own homes, not only in the United States but around the world, wherever countries have signed Status of Forces Agreements with the United States. Allegations of torture were first received from countries with which the United States has a special intelligence-sharing relationship i.e. the United

Kingdom, Canada, Australia, and New Zealand. Then reports began to arrive from the conquered countries where the United States still has large numbers of troops stationed, i.e. Germany and Japan.

Without your knowledge you could be a target of microwave weaponry.

Statement by Air Force Secretary Michael Wynne, 9/12/06

WASHINGTON - Nonlethal weapons such as **high-power microwave devices should be used on American citizens in crowd-control situations** before they are used on the battlefield, the Air Force secretary said Tuesday.

Many people report symptoms of electromagnetic radiation sickness, WHO

Medical News Today

Huntington Beach, California – Douglas Pasternak of U S News, writes, "For over forty years the U. S. military has pursued the development of weapons that use energy waves or pulses," to harm or disable human targets. One of the energy sources involved in these weapons is microwaves. The microwave is a naturally occurring wave in our universe. We live with them everyday and have adapted to low levels of microwave energy. The danger is when the energy of the microwave is increased and directed at a human target. The results of these attacks can produce some of the following symptoms: dizziness, weakness, jerks to muscles, abdominal pain, mental confusion, buzzing in the head, or ears. These weapons are being tested today in the United States and Europe on unwilling and unknowing private citizens.

Are you or someone you know a target of organized stalking or directed energy weapons? It is our ultimate goal to raise awareness of these issues to the public-at-large and in Congress so that laws will be passed and other measures taken to free those entrapped in what is known as "the silent holocaust."

The goal of our organization is to educate the general public about the tactics and technology that are being used to torture, torment, and covertly control individuals, or large populations.

As more information becomes available to the general public, this will in effect bring about the eradication of organized stalking activity.
